Professional Summary

Computer Science student with hands-on experience building full-stack applications using Java, Spring Boot, React.js, MySQL, PostgreSQL, and REST APIs. Seeking opportunities to contribute strong problem-solving and software engineering skills in a professional environment.

Education

Parul University B.Tech in Computer Science & Engineering CGPA: 7.52/10	Vadodara, Gujarat, India 2023 – 2027
Sri Viswa Junior College Intermediate (MPC) 89%	Visakhapatnam, India 2021 – 2023

Technical Skills

Languages	Java, Python, C, JavaScript
Full-Stack Development	Java, Spring Boot, React.js, REST APIs, JWT Authentication, Hibernate/JPA
Databases	MySQL, PostgreSQL, Query Optimization, Indexing, Schema Design
Computer Science	Data Structures & Algorithms, Object-Oriented Programming, System Design Fundamentals
Cloud & DevOps	AWS, Microsoft Azure, Git, GitHub, Docker Fundamentals, CI/CD Fundamentals
Testing & Tools	Postman, VS Code, API Testing, Agile/Scrum

Projects

SGnexasoft Freelance Platform Live Demo <i>Spring Boot, React.js, MySQL, JWT, REST APIs, Hibernate/JPA</i>	2026
--	------

- Developed a full-stack freelance platform using Spring Boot and React.js with separate user and administrator dashboards.
- Implemented secure JWT-based authentication and role-based access control for protected application workflows.
- Designed and integrated RESTful APIs between the React frontend and Spring Boot backend using modular and maintainable architecture.
- Integrated Hibernate/JPA with MySQL for persistent data management and structured database operations.

ErpFlow Live Demo <i>React.js, Node.js, PostgreSQL, REST APIs</i>	2026
---	------

- Built an ERP-style full-stack web application for managing business workflows, records, and role-based dashboards.
- Developed RESTful backend APIs and a responsive React.js frontend for efficient business process management.
- Designed PostgreSQL database structures for reliable data storage, retrieval, and workflow tracking.
- Deployed the application using modern cloud hosting workflows with separate frontend and backend environments.

- Developed a real-time banking fraud detection system to identify suspicious transactions and generate transaction summaries.
- Applied HashMap-based transaction tracking and graph algorithms including DFS-based cycle detection to identify potential money-laundering patterns.
- Optimized SQL queries and database indexing strategies, achieving approximately 35% faster transaction lookup in project testing.
- Implemented modular and secure coding practices for transaction analysis and diagnostic reporting.

Virtual Internships

- **JPMorgan Chase & Co. – Software Engineering Virtual Experience (Forage)**
Completed a software engineering simulation focused on enterprise development workflows, software lifecycle practices, and practical engineering tasks.
- **Deloitte – Cybersecurity Job Simulation (Forage)**
Completed a cybersecurity simulation involving threat detection, security controls, risk analysis, and client-oriented security communication.
- **Deloitte – Data Analytics Job Simulation (Forage)**
Completed a data analytics simulation involving data analysis, dashboard interpretation, and generation of business insights.

Certifications

- **Oracle** – Oracle Analytics Cloud
- **NPTEL – IIT Kharagpur** – Computer Networks
- **Microsoft & LinkedIn Learning** – Generative AI

Achievements

- **LeetCode – 400+ Problems:** Solved 400+ problems covering Data Structures, Algorithms, and problem-solving patterns across a wide range of coding challenges.
- **HackerRank – 5-Star Coder:** Achieved a 5-star rating in Java and Problem Solving, demonstrating strong programming and algorithmic skills.
